Hi sweet heart;

I am really a broken down old seabee today, I am just about pooped out. It is so hot here today the sweat is just pouring off of me. I can feel it run down my hide in little rivers, and it is not because I have too many clothes on because I am just as naked as the girls in this picture. I just got up to look at the thermometer and I see there is a puddle of water where I was sitting. So when it gets hot at home there for the next couple of months just let the water run off of you and think nothing of it. I wish I was home for these couple of months you would keep cool watching me freeze and shiver. When the thermometer gets up to eighty five and ninety five in the shade just go out in the sun for awhile and start working. Then you can make up your mind whether you would like to live in the tropics or not. I know you never could stand the heat at home without sweating your head off. Then when the water is pouring off of you just try to figure what you would look like after eighteen months, with the temperature above eighty ninety per cent of the time day and night. I thought sure I would get some mail today, we didn't get any yesterday and so far none today, so I suppose we will get a flock of mail again

a short time left to wait. and now that the time is going so fast and we are busy. It seems the week is gone before I know it. I don't doubt that many of the girls figure they have a hard time working for a living, but I really think their work would be a lot easier for them if they would know enough to pick out some type of work they liked to do, and really take an interest in their work. If they would do that it wouldn't be long before they got a promotion and they would enjoy working. I know that when we were on Treasury and our work slacked up I had too much time for thinking and it gets you feeling sorry for yourself so I am glad, that we have a lot of work ahead of here. I don't know about Andrewjeski getting out of the armed forces because he is a welder. You know they can use a lot of welders both in the army and the navy, and they want the good ones. They would have to learn to manage the same as everybody else has had to do. Lots & Lots of Loves/Kisses not just the usual amount

Otto
